Solidarity messages to the people of Ryedale

From Friends of the Earth Scotland
From Food and Water Watch Europe

“We have to stop fracking in Ryedale because - due to the methane emissions - it will also mean more climate change. This means that more people from the Global South will be - most probably - forced to leave their home countries and try to get to the EU, which could give further rise to xenophobe, populist tendencies we see already today in several Member States. Climate change in Europe will also severely impact our agriculture and therefore our farmers and the food prices. On the long run, climate change will profoundly change European social and economic systems and affect every EU-citizens’ life substantially.”
From Friends of the Earth International at the climate talks in Marrakesh
FRACKING in Ryedale is a CLIMATE CRIME that KILLS me!
FRACKING in Ryedale is a CLIMATE CRIME that KILLS me!
FRACKING in Ryedale is a CLIMATE CRIME that KILLS me!
From Balcombe

“A multitude of communities now stand together, nation-wide, world-wide, against an industry and governments who are determined to drain our ‘extreme’ geology of oil and gas. People power will defeat them - people united, determined to protect our environment, clean air and water, our health and the health of future generations, indeed the very future existence of our planet. Every battle along the way matters to all of us. Ryedale, your fight is our fight. We support you.”
From Citizens’ group against Fracking and CCS (Carbon, Capture & Storage)

“#DontFrackYorkshire. We have to stop fracking in Yorkshire, because climate change cannot be stopped, if new sources of fossil fuels are explored. We also are fighting against fracking to protect our water, our health, our environment, and the future of our children and grandchildren. This is independent from the question, where Fracking takes place.

Solidarity from Germany”
From Friends of the Earth Sweden

From Friends of the Earth Europe
From Wenonah Hauter, executive Director of Food and Water Watch

“We must make the investments necessary for a quick and just transition to a 100% renewable energy future, so we can usher in the “Clean Energy Revolution” we desperately need to avoid the worst impacts of the climate emergency. The time has come for us to call on our elected leaders to ensure a sustainable future for our country, communities and families. Our global and growing movement will not stop sending out the simple and clear message that we need a future powered by clean, renewable energy, not by dirty, polluting fossil fuels.”
From Juliette Harris and Academy Films London

From BI lebenswertes Korbach e.V., Germany

"We can't accept any more excuses. We all know that we need to keep fossil fuels in the ground and safeguard our climate! United we have the power to make the necessary difference! The time is right and the time is now!"
